

PBI Suspect Identification and Verification System (SIVS) Pilot

Location of Assignment	Dhaka, Bangladesh
Client	Police Bureau of Investigation (PBI), Bangladesh Police
Reference Contact	Mia Masud Karim Project Director Email: sspa_f.pbi@police.gov.bd Phone: 02-9615721
Contract Value	BDT 1,420,400.00
Period of Activity	April 2016 to June 2016
Status	Completed
Nature of Work	The project scope included, but not limited to, design and development of the web and mobile based application software for PBI Suspect Identification and Verification System. This was the pilot project for PBI SIVS, which later evolved into a nationwide suspect identification and verification system for PBI through subsequent contracts and further development of the system. Scope of this project thus included the integration and configuration of the components supplied with the system software so that PBI officials can seamlessly use them both at crime scene and in office. The system facilitates matching the captured data against the NID database to verify the identity. The system is capable of matching with BEC citizen database of over 100 million records and instantly view the NID information on screen through 1:N fingerprint match.
